Art Unit: 2621

## Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-12 and 14-15, drawn to a subject matter of image coder and decoder systems comprising wavelet conversion, classified in Class 382, subclass 240.

Group II. Claims 13 and 16, drawn to a subject matter of decoding system comprising gain adjustment, classified in Class 382, subclass 233.

2. The inventions of Groups I and II are distinct from the each other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed, Invention I, does not require the particulars of the subcombination that of "gain adjustment means" as claimed in Invention II for patentability. The subcombination has separate utility such as "gain adjustment means/step for high-band component coefficient".

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter, and required the different field of search for each of these inventions, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37)

Application/Control Number: 09/919,925

Art Unit: 2621

CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M. Dang whose telephone number is (703) 305-1464. The examiner can normally be reached on Monday to Thursday from 6:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H. Boudreau, can be reached on (703) 305-4706. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for all communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-0377.
